JOIN OUR HABITAT III NETWORKING EVENT
A PATHWAY TO INCLUSIVE CITIES: MULT-LEVEL GOVERNANCE
FOR CLIMATE RESILIENT URBANISATION
14.00-16.00 • Quito, Ecuador

We are pleased to invite you to our networking event “A pathway to inclusive cities: multi-level governance for climate resilient urbanisation”, to be held on the third day of the Habitat III Conference in Quito, Ecuador.

Climate change and urbanisation have become defining drivers of change. How can we build inclusive cities while meeting the challenges of rapid urbanisation and climate change? The networking event sets out to answer this question from a multi-level governance perspective and engages participants in jointly building a pathway towards a climate-resilient, inclusive city. “Urban stories” shared by national and local governments, researchers, NGOs and citizens will illustrate real life-examples of urban planning, inclusion and climate action that will be the basis of discussing concrete building blocks for the implementation of the New Urban Agenda.

- › **Contributors:** Mayor Ed Pamintuan (League of Cities of the Philippines),
Ofelia Bagotlo (Slum Dwellers International),
Matthias Schmoll (German Ministry for the Environment) (TBC),
Ramón Marrades (URBEGO)
- › **Moderator:** Scott Muller (LEDS GP Working Group on Subnational Integration)
- › **Venue:** Room MR4, Habitat III Conference venue, Casa de la Cultura Ecuatoriana Benjamín Carrión.

The event will be held in English. adelphi is organising this event in the framework of the International Climate Initiative (IKI) project “[Vertical Integration and Learning for Low-Emission Development in Africa and Southeast Asia](#) (V-LED)”, supported by the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety.
